

## Technical Data

# Printed Wall Art Decorative Panels

Inpro's Printed Wall Art panels are constructed to maximize the visibility of artwork and to protect the imagery itself. Our panels can be broken down into three distinct layers:

### Layer 1 - Clear Plastic Base

The base material is made from .118 (3mm) plastic, or thermoplastic polymer resin. It is transparent with a matte or glossy finish and is shatterproof.

### Layer 2 - Printed Image

High resolution printed image is applied to the second surface (back side) of the clear plastic overlay. Printing to the second surface protects the imagery from damage, fading or harmful cleaning solutions.

### Layer 3 - White Backer

An opaque white backer is applied behind the printed graphic. The backer is used to enhance the graphic colors while blocking the wall behind it.

## READY TO ORDER?

### ☐ CHECK THE SPACE & MEASURE

*Measure the area you would like to cover. Be mindful of the locations of door openings, outlets, windows and any other potential obstructions.*

### ☐ SELECT SIZE(S)

*Determine the best size(s) to meet your project's needs. The panel's orientation can be switched between landscape and portrait to maximize coverage. Custom sizes are available upon request.*

### ☐ ARTWORK

*Selecting the right image for your display is probably the most important part of the project. Take care to choose wisely. Have you created the artwork? Great, you can upload that to directly to Inpro. If you have an idea, but no artwork, Inpro has access to vast library of images with **Getty** and **Shutterstock** and can assist in helping you find the right image.*

### ☐ MOUNTING

*The look you want along with the surface you are mounting to will determine the best mounting method. We are happy to help determine the best mounting options for your project.*

### ☐ QUESTIONS or CONCERNS?

*Our friendly and knowledgeable sales team is ready to guide you through the process to ensure a successful project.*
